## FILTER DETAILS

500 Series filter bags are made from 100% pure polypropylene fibres that perform with up to 99% efficiency. These high performance bags are constructed with over 40 square feet of useable media, compared to only 4.4 square feet of available media in standard filter bags.

These bags can handle absorbing unwanted trace oils and have a holding capacity of up to 25 times its weight. All 500 Series bags meet FDA regulations for food and beverage contact and are free of any silicone oils which may be detrimental to certain applications. All 500 bags are made standard with stainless steel rings however other ring/flange options are available.

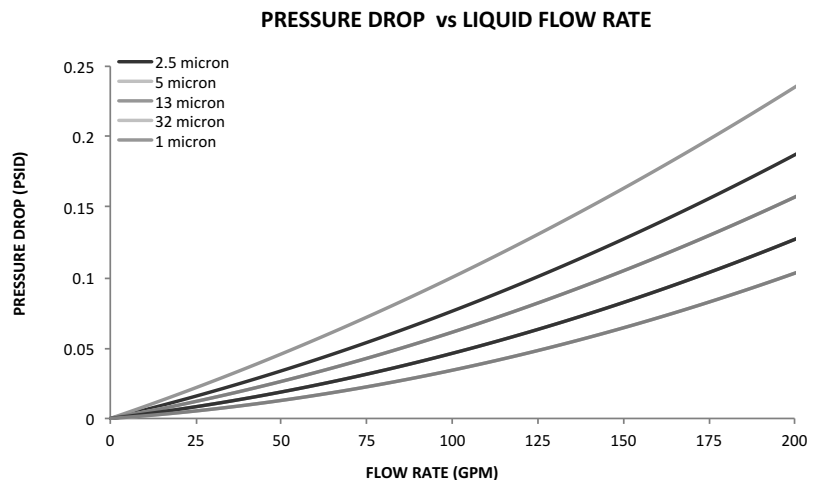

**500 Series bags are ONLY available in size 2 dimensions (7" x 32")**
